NOS ATOUTS:

QUALITÉ - DISPONIBILITÉ - RÉACTIVITÉ

Spécialisés dans la fabrication et la commercialisation d'instruments chirurgicaux, nous proposons 4 gammes de dispositifs médicaux:

IN'SURG STANDARD

Instruments chirurgicaux d'usages courants toutes spécialités chirurgicales confondues.

Garantie totale 5 ANS sans conditions

IN'SURG ULTRA LINE

Ciseaux lame sabre et lame crantée (ciseaux dissecteurs, vasculaires etc...) :

AFFUTAGE GRATUIT LES 5 PREMIERES ANNEES

Porte-aiguilles (boitier monobloc),

Pinces hémostatiques et nos passe fils (dissecteurs),

Pinces à disséquer (assemblage par soudure laser).

Garantie totale 10 ANS sans conditions

IN'SURG OPEN LINE

Nos rongeurs et pinces à disque destinés aux interventions sur le rachis.

DÉMONTABLES NON DÉTACHABLES.

Garantie totale 5 ANS sans conditions

IN'SURG TITAN ULTRA

Instruments de microchirurgie tels que :

Porte-aiguilles TITAN corps ronds, corps plats, avec ou sans verrou….

Ciseaux TITAN corps en titane avec ou sans contre poids, double articulation….

Pinces à disséquer TITAN (DEBAKEY, avec ou sans griffe, avec ou sans plateau…)

Garantie totale 2 ANS sans conditions

Grâce à nos **6000 références** disponibles en stock, nous vous proposons un vaste choix de dispositifs médicaux couvrant l'ensemble des spécialités chirurgicales.

NOTRE SAVOIR-FAIRE :

- Une équipe composée d'experts disposant de 25 ans d'expériences dans l'instrumentation chirurgicale.
- Contrôle qualité unitaire sur 100% de nos produits.
- La disponibilité afin de répondre à vos demandes dans les meilleurs délais :
  Devis et livraison, en 24 / 48h.
- L'écoute active pour répondre à vos besoins et vous accompagner au quotidien (conseil, audit, formation…)
- La transparence : Stock en temps réel sur nos devis, nos confirmations de commandes et sur notre site **www.in-surg.fr**
- Des dispositifs médicaux marqués CE, au prix du marché, présents en France et à l'international.
- L'intégration de la qualité dans la stratégie globale de la société.

Certifiée NF EN ISO 13485 depuis 2021, ce référentiel nous permet :

- De garantir la maîtrise du système de management de la qualité.
- De démontrer le respect des exigences des clients, des exigences normatives et réglementaires.
- D'assurer la sécurité de tous nos processus de fabrication.
- D'engager la mise en œuvre du nouveau règlement (UE) 2017 / 745 (MDR Médical Device Regulation).

Consciente des enjeux de la Responsabilité Sociétale des Entreprises (RSE), IN'SURG s'est engagée dans une démarche Eco-responsable et déploie en son sein des actions visant à minimiser son impact environnemental.

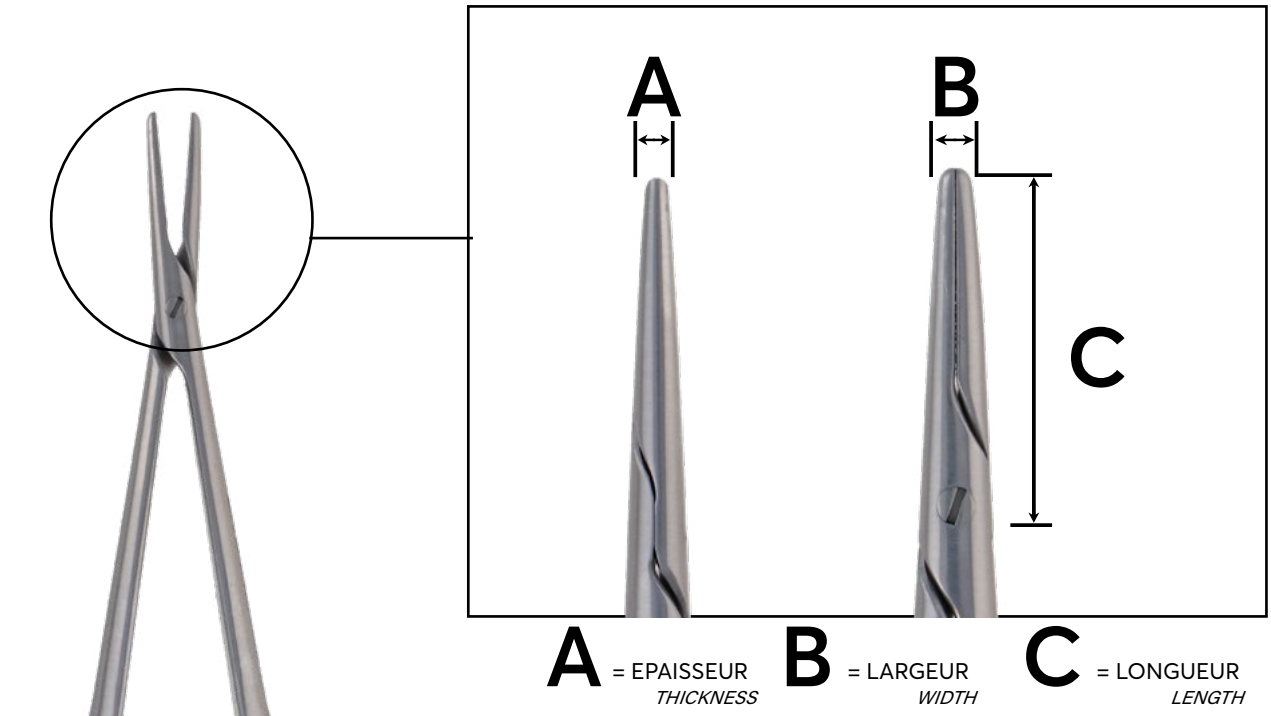
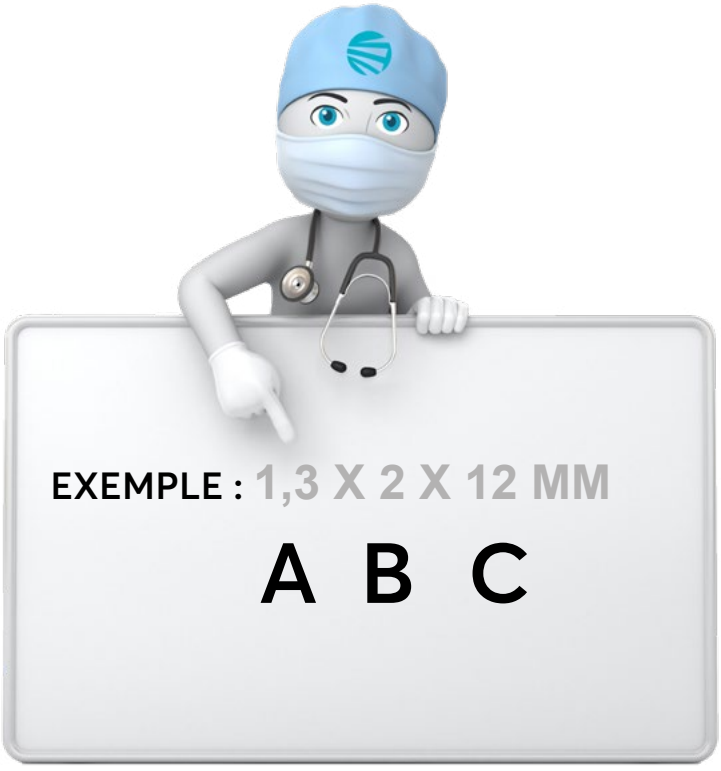
LECTURE DES DIMENSIONS

READING DIMENSIONS

P355161 : PORTE AIGUILLE MICRO CASTROJIEVO 1,3 X 2 X 12 X 180 MM DROIT CORPS ROND A VERROU MORS DIAMANTES





Le fonctionnement est identique pour l'ensemble de notre gamme micro (porte aiguille standard ou titane, ciseaux standard ou titane)

THE UNDERSTANDING IS EXACTLY THE SAME FOR ALL «MICRO» RANGE (MICRO NEEDLE HOLDER STANDARD OR TITAN, MICRO SCISSORS STANDARD OR TITAN).

MODE D'EMPLOI

La structure de nos libellés :

PINCE HEMOSTATIQUE | KOCHER | 140 MM | COURBE A GRIFFES

- **LA FAMILLE DU DISPOSITIF**
- **LE NOM D'AUTEUR**
- **LES DIMENSIONS**
- **LES SPÉCIFICITÉS TECHNIQUES**

LONGUEUR *LENGTH*	A GRIFFES *WITH TEETH*	SANS GRIFFE *WITHOUT TEETH*
140 MM	P194556	P194557

- **Les spécificités techniques :**
- **courbe, droite, à griffes, sans griffe...**

La structure de nos références :

P19 4557

- **La première lettre et les deux premiers chiffres caractérisent la famille du dispositif**
- **Ici dans l'exemple, P19 correspond à la famille des «PINCE HEMOSTATIQUE»**

RETRO 'SPECTIVE

Claude BERNARD
(12 juillet 1813 - 10 février 1878)

était un **médecin, physiologiste et épistémologue** français. Dès 1850, il met en lumière **l'homéostasie**, un an plus tard, il **découvre le rôle de la sécrétion pancréatique** ainsi que l'augmentation de la température cutanée après section du nerf sympathique cervical.

Williams Harvey **CUSHING**
(8 avril 1869 - 7 octobre 1939)

est unanimement considéré comme **le plus grand neurochirurgien du XXe siècle** et le «**père de la neurochirurgie moderne**». Il est **le premier chirurgien américain à opérer une tumeur du cerveau** et a considérablement amélioré la survie des patients.

RETRO 'SPECTIVE

Willem EINTHOVEN
(21 mai 1860 - 29 septembre 1927)

était un **physiologiste** néerlandais renommé ayant reçu **le prix Nobel de médecine** en 1924, pour avoir inventé **le premier électrocardiogramme.** Il donna alors naissance à la **cardiologie moderne.** Il a également publié un article et mené de nombreuses études sur les diverses illusions géométriques-optiques.

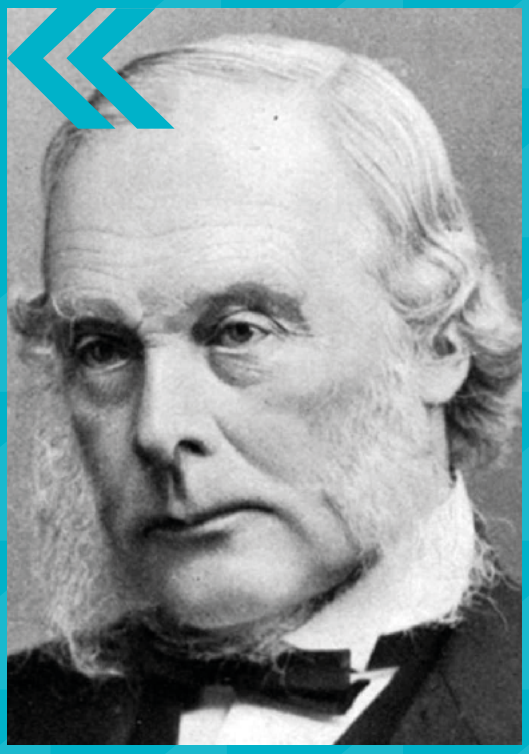
Joseph LISTER
(5 avril 1827 - 10 février 1912)



était un **chirurgien** britannique. Il est l'**un des pionniers ainsi que le vulgarisateur le plus efficace de l'antisepsie dans la chirurgie opératoire.** Afin de tuer les micro-organismes présents dans l'air ambiant, Lister **vaporise du phénol.** Il parvient ainsi en 1869 à réduire le taux de mortalité opératoire de 60 à 15%.

P

RETRO 'SPECTIVE

Jules Émile PÉAN
(29 novembre 1830 - 30 janvier 1898)

était un **chirurgien** français, **inventeur de la pince hémostatique et de la valve Péan.** Il est aussi le premier à réussir une **splénectomie et l'ablation du kyste de l'ovaire.** Il invente avec son collègue l'**opération de Pean-Segond** et une autre qui porte uniquement son nom consistant à effectuer une gastrectomie.

PORTE AIGUILLE ULTRA LINE

ULTRA LINE NEEDLE HOLDER

TOUS NOS PRODUITS ULTRA LINE SONT GARANTIS 10 ANS ET REMPLACÉS SANS CONDITIONS

AXE TRAVERSANT
NON MONOBLOC

BOITIER MONOBLOC

SPÉCIFICITÉS :

Amélioration de la fiabilité et la durée de vie de l'instrument grâce au boitier MONOBLOC
Les plaquettes sont fraisées et usinées en pyramide, elles sont fixées en même temps que la réalisation du traitement thermique du porte aiguille.
Meilleure tenue de l'aiguille en bout de plaquette
Parfait ajustage des plaquettes en carbure de tungstène

RETRO 'SPECTIVE

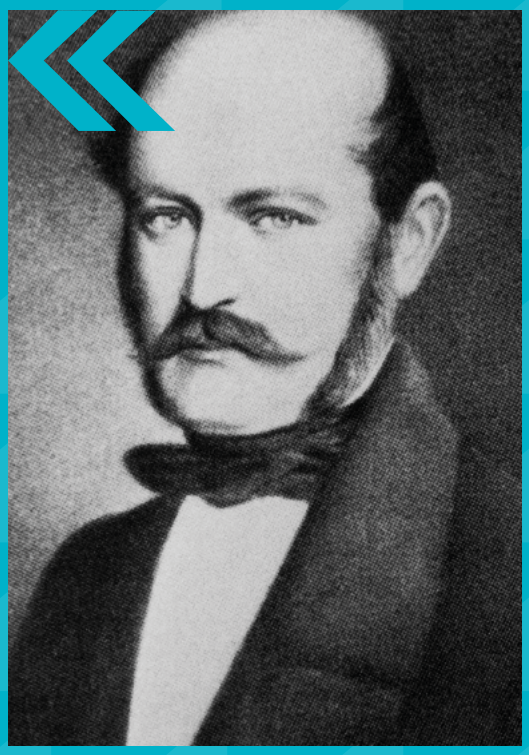
Ignace Philippe SEMMELWEIS
(1er juillet 1818 - 13 août 1865)



était un **médecin obstétricien** qui démontra l'**utilité du lavage des mains après la dissection d'un cadavre**, **ou avant d'effectuer un accouchement**, ce qui diminuait le nombre de décès causés par la fièvre puerpérale des femmes après l'accouchement. Il **prescrit l'emploi d'une solution d'hypochlorite de calcium pour le lavage des mains**; le taux de mortalité passe alors de 12 % à 2,4 %.

NOTRE PARTENAIRE

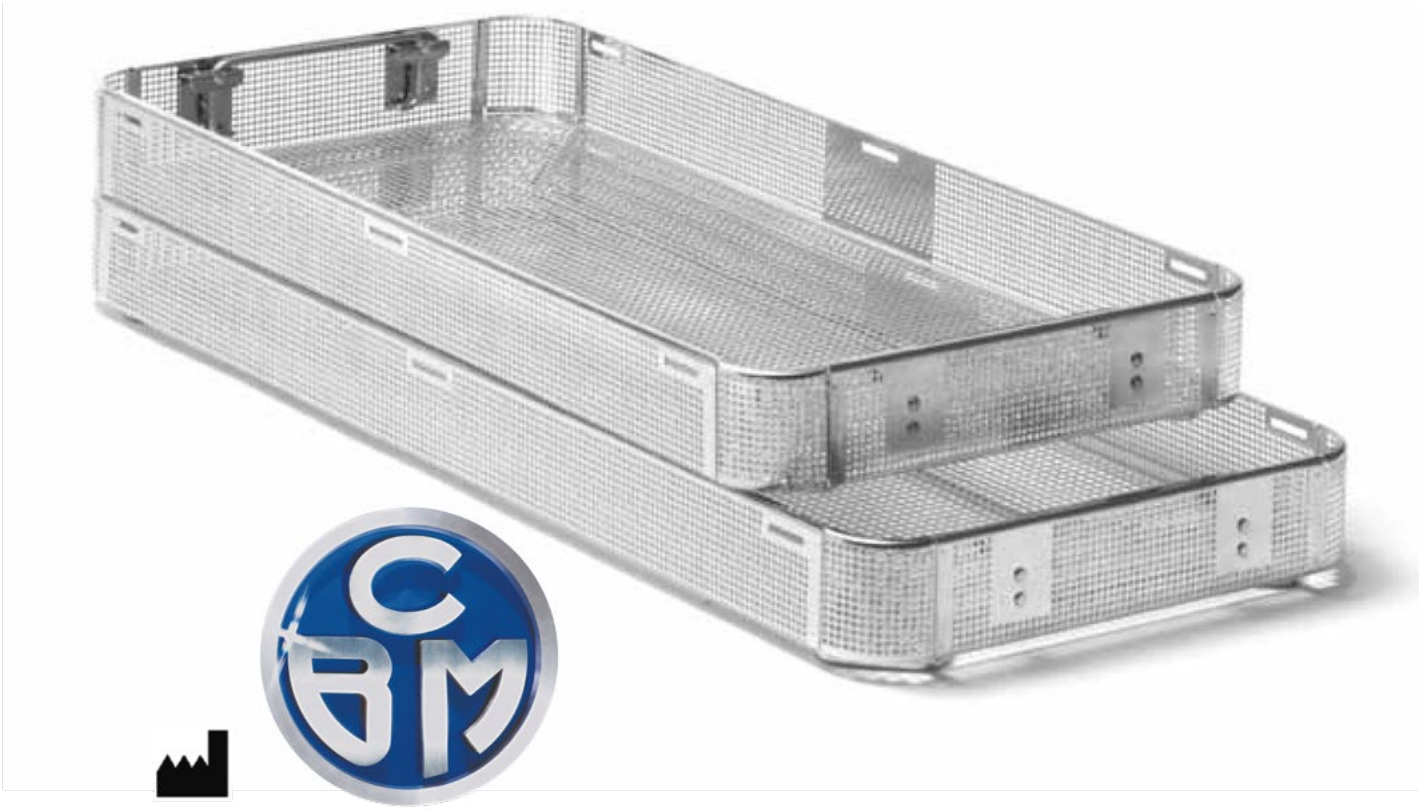
Depuis 1945 à Milan, la société CBM s'est spécialisée dans le secteur de la stérilisation, en réalisant des paniers et calages de haute qualité et de grande fiabilité.

Paniers en tôle perforée garanties à vie.

La certification du système qualité qu'elle a obtenu depuis 1995 confirme la qualité de sa production.
Normes EN ISO 13485:2016

PANIER ET CALAGE

BASKET AND CUSHIONING



(FRA)

Les paniers en tôle perforée en acier AISI304 inoxydable représentent une évolution dans notre gamme de paniers en inox. Grâce à un processus de production flexible, nous sommes en mesure de réaliser une vaste gamme de dimensions aussi bien que de modèles personnalisés pour répondre aux exigences de nos clients. L'emploi de tôle en acier inoxydable assure une grande solidité et fiabilité.

Les paniers en tôle perforée permettent la pénétration de la vapeur et des détergents de nettoyage, en empêchant tout déplacement du matériel sur les côtés.
Tous les paniers sont pourvus de deux grandes poignées escamotables pour l'entretien du matériel. Le pied, en acier inoxydable, assure un empilement sûr et une meilleure robustesse.

Entirely perforated 4x4 — Entièrement perforé 4x4

(ENG)

Perforated sheet baskets of Mini and Micro range are used to transport small medical devices to wash, wrap and sterilize. Mini ba-skets have a 2x2 side perforation to avoid any exits of sharp tips, while 4x4 perforation of bottom and lid allows liquids drainage. Micro baskets are entirely 2x2 perforated to hold very small devices. Both of them have smooth surfaces to save paper wrapping.

(FRA)

Les paniers en tôle perforée de la gamme Mini et Micro sont utilisés pour le transport de petits dispositifs médicaux à nettoyer, emballer et stériliser. Les paniers Mini pré-sentent une perforation latérale 2x2 pour empêcher la sortie d'extrémités pointues, tandis que la perforation 4x4 du fond et couvercle permet le drainage de liquides. Les paniers Micro sont entièrement perforés 2x2 pour contenir les dispositifs très petits. Les deux modèles ont surfaces lisses pour préserver les emballages en papier.

Basket System

Wire mesh baskets — Paniers grillagés

(ENG)

The traditional series of mesh baskets allows instruments handling during washing and sterilising phases as well as during use. Along with the series of DIN sizes, CBM produces other sizes that can meet the needs of sterilising centres.

Easy Fit System

Silicone Soft Lips

—

Barrettes en silicone Soft Lips

(ENG)

Soft lips can be mounted on the lid of a basket. Thanks to its design Soft lips are suitable to retain instruments into perforated baskets equipped either with Flexymat or Easy Fit.

(FRA)

Les barrettes amovibles en silicone peuvent être installées sur le couvercle du panier. Grace à leur design elles sont parfaites pour maintenir immobiles
les instruments à l'intérieur du panier équipé par le tapis Flexymat ou par le système Easy Fit.

Baskets for Hegar uterin dilators

—

Panier pour dilatateur utérin Hegar

(ENG)

Perforated sheet baskets for Hegar holders are used for positioning and transport of Hegar. The fixed silicone lip positioned on the lid of the basket allows the fixing of the hegar when the lid is closed, preventing their movement.
The silicone supports are screwed to the body of the basket and they have growing sizes to lodge hegars from the smallest up to biggest diameter.

(FRA)

Les paniers en tôle perforée avec porte-Hegar sont utilisés pour le positionnement et le transport de Hegar. La barrette de silicone fixe positionnée sur le couvercle du panier permet la fixation de Hegars quand le couvercle est fermé, en empêchant tout mouvement. Les supports en silicone sont vissés au corps du panier et ils présentent des dimensions croissantes pour permettre la déposition de Hegar, de diamètre le plus petit au plus grande.

Microsurgery baskets with silicone mat

—

Paniers avec tapis en silicone pour microchirurgie

(ENG)

Perforated sheet basket for microsurgery are used for positioning delicate surgical instruments for microsurgery (ophthalmic, dentistry, etc.). They fit perfectly for every need and they are essential in disinfection, ultrasonic washing and steam sterilization processes. Thanks to the silicone mat positioned in the basket body and to both fixed soft lips arranged on the lid, instruments are perfectly blocked avoiding any damage during handling.

(FRA)

Les paniers en tôle perforée pour microchirurgie sont utilisés pour le positionnement de délicats instruments chirurgicaux de microchirurgie (ophtalmologie, dentisterie, etc.). Ils s'adaptent parfaitement à tous les besoins et ils sont essentiels pour les procédés de désinfection, lavage à ultrasons et stérilisation à vapeur. Grace au tapis en silicone positionné dans le corps du panier et aux barrettes en silicones fixés à l'intérieur du couvercle, les instruments sont parfaite-ment bloqués en évitant tout endommagements lors de la manipulation.

Baskets for laser optical fibre

—

Paniers pour fibres optiques laser

(ENG)

Baskets for laser optical fibre are used for positioning delicate and thin optical fibres for laser surgery. Thanks to Easyfit supports it is possible to hold the long laser fibre inside a single basket.
This solution let safely transporting and processing, avoiding any damage due to handling.

(FRA)

Les paniers pour fibres optiques laser sont utilisés pour le positionnement de délicates et très fines fibres optiques pour chirurgie à laser.
Grace aux supports Easyfit il est possible de contenir la longue fibre optique pour chirurgie à laser.
Cette solution permet de transporter et utiliser en toute sécurité, en évitant quelconque type de dommage dû à la manipulation.

ART. IN'SURG - CBM	L.	l.	h.
S130119 - 71/4FO	240	240	41

Kirschner wires dispenser — Distributeur des fils de Kirschner

(ENG)

Kirschner wires dispenser are suitable for transport, decontamination, washing and steam sterilization of the commonly used Kirschner wires. The distributors have smooth surfaces and they are completely free of sharp edges to ensure maximum safety during handling to avoid any possibility of breaking of soft packaging used for steam sterilization (paper, envelopes, etc.). The practical and safe interlocking closure system avoids any mixing of wires of different diameters. The dispenser has 2 silicone supports (latex free) positioned on the short side (one each side) to protect the tips of the Kirschner wires during handling. The wires support shows the indication of the positionable diameters with its size
(hole) test alongside each usable slot. Each slot of the support can keep up to 10 wires per diameters.

(FRA)

Le distributeur des fils de Kirschner est approprié pour le transport, la décontamination, le lavage et la stérilisation à vapeur des broches de Kirschner.
Les distributeurs ont des surfaces lisses et ils sont sans bords tranchants afin d'assurer une sécurité maximale lors de la manipulation, cela évite toute possibilité de rupture des emballages souples utilisés pour la stérilisation à vapeur (papier, enveloppes, etc.).
Le système de fermeture à verrouillage est pratique, sûr et évite le mélange des broches de diamètres différents. Il présente 2 supports en silicone (non toxique) positionnés sur les bords courts (un de chaque côté) pour protéger la pointe des broches de Kirschner pendant la manipulation.
Sur le support se trouve les diamètres pour chaque broche.
Le logement du support peut comporter jusqu'à 10 broches par diamètre.

(ENG)

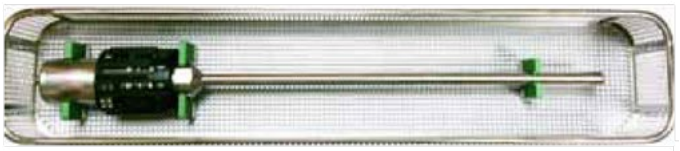
They are equipped with non toxic Easyfit silicone and stainless steel supports. Lid with handle and sliding dou-ble closing system.

(FRA)

Ils sont équipés de supports Easyfit en silicone atoxique et acier inoxydable. Le couvercle a une poignée et une double fermeture coulissante.



Laparoscopic frames

—

Supports pour laparoscopie

(ENG)

Laparoscopic frames are very useful for the creation of a single patient laparoscopic surgery kit.
The sturdy wire frame, entirely made in stainless steel AISI304, allows the correct steam circulation all around the laparoscopic instruments. Moreover, thanks to its design, Laparoscopic frame can be used to extract aseptically the entire kit from sterilization packaging and safely place all the instruments on the instruments table.

(FRA)

Les supports pour laparoscopie sont très utiles pour la création de kits séparés pour la chirurgie laparoscopique du patient. Le support en fil solide, entièrement en acier inoxydable AISI304, permet la correcte circulation de la vapeur atour des instru-ments laparoscopiques. En outre, grâce à son design, le support pour laparoscopie peut être utilisé pour extraire, de façon aseptique, de l'em-ballage de stérilisation le kit entier et placer tous les instruments sur la table en toute sécurité.

Arthroscopic instruments frames
—
Supports pour instruments d'arthroscopie

(ENG)

Arthroscopic instruments frames are useful to create sets for unique procedure. The stainless steel Aisi304 strong structure, together with Easyfit silicone supports, allow to put arthroscopic instruments and Kerrison punches in a functional way. Arthroscopic instruments frames can be fixed inside perforated sheet baskets using screws.

(FRA)

Les supports pour les instruments d'arthroscopie sont utiles pour créer des sets à procédure unique. La structure solide en acier inoxydable Aisi304, avec les supports en silicone Easyfit, permet de loger de manière fonctionnelle les instruments pour arthroscopie et les rongeurs de Kerrison. Les supports pour les instruments d'arthroscopie peuvent être fixés à l'intérieur de paniers en tôle perforée par les vis.

RETRO 'SPECTIVE

Armand TROUSSEAU
(14 octobre 1801 - 23 juin 1867)

était un **médecin, clinicien et homme politique** français ayant effectué des recherches sur **la fièvre jaune.** Il fût récompensé pour ses travaux. Il sera l'**un des premiers à appliquer la trachéotomie.** Son nom sera donné à une **contracture de la main (signe de Trousseau)**, ainsi qu'à **un dilatateur et une canule.**

V

RETRO 'SPECTIVE

Richard von VOLKMANN
(17 août 1830 - 28 novembre 1889)

était un **poète et chirurgien** allemand. Il réalisa **la première excision d'un carcinome du rectum** en 1878, décrit le **syndrome de Volkmann** en 1881 puis **invente une attelle et une cuillère qui portent son nom.** Son **traitement de la tuberculose articulaire** fait la gloire de la chirurgie préventive.
