

NOS ATOUTS:

QUALITÉ - DISPONIBILITÉ - RÉACTIVITÉ

Spécialisés dans la fabrication et la commercialisation d'instruments chirurgicaux, nous proposons 4 gammes de dispositifs médicaux:

IN'SURG STANDARD

Instruments chirurgicaux d'usages courants toutes spécialités chirurgicales confondues.

Garantie totale
5 ANS
sans conditions

IN'SURG ULTRA LINE

Ciseaux lame sabre et lame crantée (ciseaux dissecteurs, vasculaires etc...) :

AFFUTAGE GRATUIT LES 5 PREMIERES ANNEES

Porte-aiguilles (boitier monobloc),

Pincés hémostatiques et nos passe fils (dissecteurs),

Pincés à disséquer (assemblage par soudure laser).

Garantie totale
10 ANS
sans conditions

IN'SURG OPEN LINE

Nos rongeurs et pincés à disque destinés aux interventions sur le rachis.

DÉMONTABLES NON DÉTACHABLES.

Garantie totale
5 ANS
sans conditions

IN'SURG TITAN ULTRA

Instruments de microchirurgie tels que :

Porte-aiguilles TITAN corps ronds, corps plats, avec ou sans verrou....

Ciseaux TITAN corps en titane avec ou sans contre poids, double articulation....

Pincés à disséquer TITAN (DEBAKEY, avec ou sans griffe, avec ou sans plateau...)

Garantie totale
2 ANS
sans conditions

Grâce à nos **6000 références** disponibles en stock, nous vous proposons un vaste choix de dispositifs médicaux couvrant l'ensemble des spécialités chirurgicales.

NOTRE SAVOIR-FAIRE :

- ▲ Une équipe composée d'experts disposant de 25 ans d'expériences dans l'instrumentation chirurgicale.
- ▲ Contrôle qualité unitaire sur 100% de nos produits.
- ▲ La disponibilité afin de répondre à vos demandes dans les meilleurs délais : Devis et livraison, en 24 / 48h.
- ▲ L'écoute active pour répondre à vos besoins et vous accompagner au quotidien (conseil, audit, formation...)
- ▲ La transparence : Stock en temps réel sur nos devis, nos confirmations de commandes et sur notre site www.in-surg.fr
- ▲ Des dispositifs médicaux marqués CE, au prix du marché, présents en France et à l'international.
- ▲ L'intégration de la qualité dans la stratégie globale de la société.

Certifiée NF EN ISO 13485 depuis 2021, ce référentiel nous permet :

- De garantir la maîtrise du système de management de la qualité.
- De démontrer le respect des exigences des clients, des exigences normatives et réglementaires.
- D'assurer la sécurité de tous nos processus de fabrication.
- D'engager la mise en œuvre du nouveau règlement (UE) 2017 / 745 (MDR Médical Device Regulation).

Consciente des enjeux de la Responsabilité Sociétale des Entreprises (RSE), IN'SURG s'est engagée dans une démarche Eco-responsable et déploie en son sein des actions visant à minimiser son impact environnemental.

RETRO 'SPECTIVE

Claude BERNARD
(12 juillet 1813 - 10 février 1878)

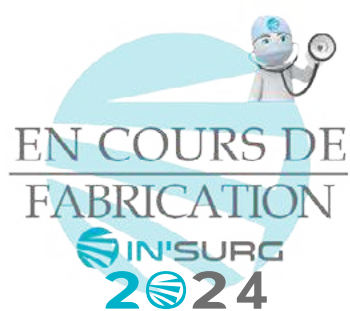

était un **médecin, physiologiste et épistémologue** français. Dès 1850, il met en lumière **l'homéostasie**, un an plus tard, il **découvre le rôle de la sécrétion pancréatique** ainsi que l'augmentation de la température cutanée après section du nerf sympathique cervical.

RETRO 'SPECTIVE

Williams Harvey CUSHING
(8 avril 1869 - 7 octobre 1939)

est unanimement considéré comme le **plus grand neurochirurgien du XXe siècle** et le «**père de la neurochirurgie moderne**». Il est le **premier chirurgien américain à opérer une tumeur du cerveau** et a considérablement amélioré la survie des patients.

CISEAU CAPSULAIRE *CAPSULAR SCISSORS*

CISEAU CAPSULAIRE RESANO 245 MM COUDE
C100875 *RESANO CAPSULAR SCISSORS 245 MM ANGLED*

Les ciseaux à cartilage Resano sont utilisés par les chirurgiens plasticiens pour la dissection précise des tissus mous, y compris l'épaisseur du cartilage dans la rhinoplastie.

Également utilisé dans les chirurgies de la colonne vertébrale et cardiovasculaire pour une dissection précise des tissus délicats.

IN'SURG
ULTRA LINE

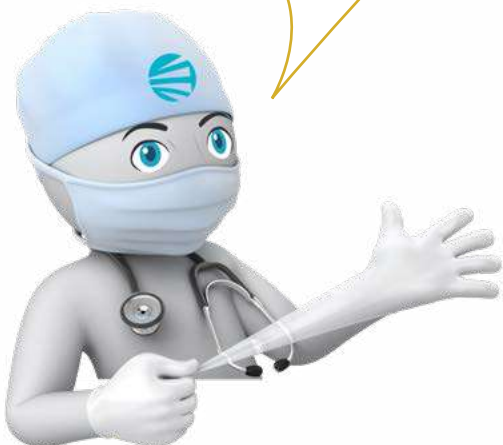

L'INSTRUMENT CHIRURGICAL
QUI VOUS CORRESPOND

Garantie totale
10 ANS
sans conditions

GARANTIE 10 ANS AVEC AFFÛTAGE OFFERT LES 5 PREMIÈRES ANNÉES !

AVANTAGE

**UNE LAME SABRE
ET

E

RETRO 'SPECTIVE

Willem EINTHOVEN (21 mai 1860 - 29 septembre 1927)

était un **physiologiste** néerlandais renommé ayant reçu **le prix Nobel de médecine** en 1924, pour avoir inventé **le premier électrocardiogramme**. Il donna alors naissance à la **cardiologie moderne**.
Il a également publié un article et mené de nombreuses études sur les diverses illusions géométriques-optiques.

RETRO 'SPECTIVE

Sir Harold Delf GILLIES (17 juin 1882 - 10 septembre 1960)

était un **médecin** britannique considéré comme l'**un des pères de la chirurgie esthétique**. Il enseigne partout dans le monde et publie en 1920 son Plastic Surgery of the Face, qui établit définitivement cette science artistique comme une spécialité de la médecine. En 1946, il devient l'**un des premiers au monde à pratiquer la chirurgie de mutation sexuelle**.

Joseph LISTER (5 avril 1827 - 10 février 1912)

était un **chirurgien** britannique. Il est **l'un des pionniers ainsi que le vulgarisateur le plus efficace de l'antisepsie dans la chirurgie opératoire**. Afin de tuer les micro-organismes présents dans l'air ambiant, Lister **vaporise du phénol**. Il parvient ainsi en 1869 à réduire le taux de mortalité opératoire de 60 à 15%.

RETRO 'SPECTIVE

Louis OMBRÉDANNE
(5 mars 1871 - 4 novembre 1956)

était un **anatomiste et chirurgien** français, spécialisé dans la **chirurgie plastique et la chirurgie pédiatrique**. Il créa le **premier prototype d'appareil inhalateur anesthésique** avec un dispositif de sécurité. En 1929 il donna **une description de l'hyperthermie maligne**, une maladie pharmacogénétique du muscle.

P

RETRO 'SPECTIVE

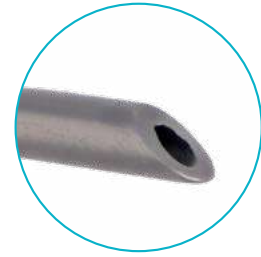

Jules Émile PÉAN
(29 novembre 1830 - 30 janvier 1898)

était un **chirurgien** français, **inventeur de la pince hémostatique et de la valve Péan**. Il est aussi le premier à réussir une **splénectomie et l'ablation du kyste de l'ovaire**.

Il invente avec son collègue **l'opération de Pean-Segond** et une autre qui porte uniquement son nom consistant à effectuer une gastrectomie.

AXE TRAVERSANT
NON MONOBLOC

BOITIER MONOBLOC

SPÉCIFICITÉS :

Amélioration de la fiabilité et la durée de vie de l'instrument grâce au boîtier **MONOBLOC**

Les plaquettes sont fraisées et usinées en pyramide, elles sont fixées en même temps que la réalisation du traitement thermique du porte aiguille.

Meilleure tenue de l'aiguille en bout de plaquette

Parfait ajustage des plaquettes en **carbure de tungstène**

RETRO 'SPECTIVE

Ignace Philippe SEMMELWEIS (1er juillet 1818 - 13 août 1865)

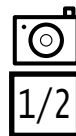

était un **médecin obstétricien** qui démontra l'**utilité du lavage des mains après la dissection d'un cadavre, ou avant d'effectuer un accouchement**, ce qui diminuait le nombre de décès causés par la fièvre puerpérale des femmes après l'accouchement. Il **prescrit l'emploi d'une solution d'hypochlorite de calcium pour le lavage des mains**; le taux de mortalité passe alors de 12 % à 2,4 %.

NOTRE PARTENAIRE

Depuis 1945 à Milan, la société CBM s'est spécialisée dans le secteur de la stérilisation, en réalisant des paniers et calages de haute qualité et de grande fiabilité.

Paniers en tôle perforée garanties à vie.

La certification du système qualité qu'elle a obtenu depuis 1995 confirme la qualité de sa production.

Normes EN ISO 13485:2016

BASKET AND CUSHIONING

(FRA)

Les paniers en tôle perforée en acier AISI304 inoxydable représentent une évolution dans notre gamme de paniers en inox. Grâce à un processus de production flexible, nous sommes en mesure de réaliser une vaste gamme de dimensions aussi bien que de modèles personnalisés pour répondre aux exigences de nos clients. L'emploi de tôle en acier inoxydable assure une grande solidité et fiabilité.

Les paniers en tôle perforée permettent la pénétration de la vapeur et des détergents de nettoyage, en empêchant tout déplacement du matériel sur les côtés.

Tous les paniers sont pourvus de deux grandes poignées escamotables pour l'entretien du matériel. Le pied, en acier inoxydable, assure un empilement sûr et une meilleure robustesse.

Entirely perforated 4x4 — entièrement perforé 4x4

Mini

Perforated metal baskets of Mini and Micro range are used to transport small medical devices for wash, wrap and sterilize. Mini baskets have a 2x2 side perforation to avoid any sorts of sharp tips, while the perforation of bottom and side allows quick drainage. Micro baskets are entirely 2x2 perforated to hold very small devices. Both of them have smooth surfaces for easy post-wrapping.

Mini

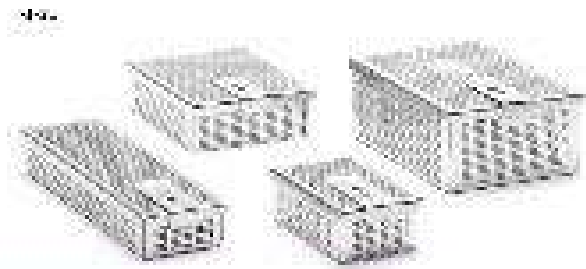

Lot/haute — Hauteur/couleur de

IN-SURG

Micro

Les corbeilles en métal perforées de la gamme Micro sont utilisées pour le transport de petits dispositifs médicaux à nettoyer, contrôler et stériliser. Les perforés Mini présentent une perforation latérale 2x2 pour empêcher le sort de crochets pointus, tandis que le bas et les cotés du fond et des côtés permettent la drainage rapide des liquides. Les corbeilles Micro sont entièrement perforées 2x2 pour contenir les dispositifs très petits. Les deux modèles ont des surfaces lisses pour faciliter les opérations en papier.

Basket System

Wire mesh baskets — Paniers grillagés

(ENG)

The traditional series of mesh baskets allows instruments handling during washing and sterilizing phases as well as during use. Along with the series of DIN sizes, GBM produces other sizes that can meet the needs of sterilizing centres.

	ART. IN'SURG - GBM	L	l	h

Easy Fit System

(ENG)

Soft lips can be mounted on the lid of a basket. Thanks to its design Soft lips are suitable to retain instruments into perforated baskets equipped either with Fleximat or Easy Fit.

(FRA)

Les barrettes amovibles en silicone peuvent être installées sur le couvercle du panier. Grâce à leur design elles sont parfaites pour maintenir immobiles les instruments à l'intérieur du panier équipé par le tapis Fleximat ou par le système Easy Fit.

Baskets for Hegar uterin dilaters

Panier pour dilataleur utérin Hegar

(ENG)

Perforated sheet baskets for Hegar holders are used for positioning and transport of Hegar. The fixed silicone lip positioned on the lid of the basket allows the fixing of the Hegar when the lid is closed, preventing their movement. The silicone supports are screwed to the body of the basket and they have growing sizes to lodge Hegars from the smallest up to biggest diameter.

(FRA)

Les paniers en tôle perforée avec porte-Hegar sont utilisés pour le positionnement et le transport de Hegar. La lamelle de silicone fixe positionnée sur le couvercle du panier permet la fixation de Hegars quand le couvercle est fermé, en empêchant tout mouvement. Les supports en silicone sont vissés au corps du panier et ils présentent des dimensions croissantes pour permettre la déposition de Hegar, de diamètre le plus petit au plus grande.

Microsurgery baskets with silicone mat

Paniers avec tapis en silicone pour microchirurgie

(FNC)

Perforated steel basket for microsurgery are used for positioning delicate surgical instruments for microsurgery (ophthalmic, dentistry, etc.). They fit perfectly for every need and they are essential in disinfection, ultrasonic washing and steam sterilization processes. Thanks to the silicone mat positioned in the basket body and to both fixed soft lips arranged on the lid, instruments are perfectly blocked, avoiding any damage during handling.

(FRA)

Les paniers en tôle perforée pour microchirurgie sont utilisés pour le positionnement de délicats instruments chirurgicaux de microchirurgie (ophtalmologie, dentisterie, etc.). Ils s'adaptent parfaitement à tous les besoins et ils sont essentiels pour les procédés de désinfection, lavage à ultrasons et stérilisation à vapeur. Grâce au tapis en silicone positionné dans le corps du panier et aux barrettes en silicone fixés à l'intérieur du couvercle, les instruments sont parfaitement bloqués évitant tout endommagements lors de la manipulation.

Microsurgery baskets with Easy Fit System

Paniers pour microchirurgie avec système Easy Fit

(ENG)

Microsurgery baskets with Easy Fit system are used for positioning surgical instruments for microsurgery. They are perfectly adapted to every need and safeguards the instruments during the disinfection, washing (ultrasound and/or thermal disinfection)

and sterilization processes. Thanks to the silicone supports positioned in the basket, instruments are perfectly fixed, avoiding any damage during handling. The lid further protects the instruments from accidental falls.

(FRA)

Les paniers pour microchirurgie avec système Easy Fit sont utilisés pour le positionnement des instruments chirurgicaux pour microchirurgie. Ils s'adaptent parfaitement à chaque besoin et protègent les instruments pendant les procédés de désinfection, lavage à ultrason et/ou thermique (désinfection) et stérilisation. Grâce aux supports en silicone positionnés dans le panier, les instruments sont fixés parfaitement, en évitant tout dommage lors de la manipulation. Le couvercle protège ultérieurement les instruments de chutes accidentelles.

Micro Dissector baskets

Paniers pour Micro Dissecteurs

(FR)

Micro Dissector baskets are used for positioning delicate neurosurgery instruments. Thanks to Easyfill supports and tilting system it is possible to put up to 19 micro instruments. When tilting system is in rest position, and basket lid is closed, micro instruments can be carried, washed and packed safely, avoiding any damage due to handling.

(FR)

Les paniers pour Micro Dissecteurs sont utilisés pour le placement délicat de tels instruments pour neurochirurgie. Grâce aux supports Easyfill et au système de basculement, il est possible de loger jusqu'à 19 micro instruments. Quand le système de basculement est en position de repos, et le couvercle est fermé, les micro instruments peuvent être transportés, lavés et emballés sans risque, en évitant quelconque type de dommage dû à la manipulation.

Baskets for laser optical fibre

Paniers pour fibres optiques laser

(ENG)

Baskets for laser optical fibre are used for positioning delicate and thin optical fibres for laser surgery. Thanks to Easyfit supports it is possible to hold the long laser fibre inside a single basket.

This solution let safely transporting and processing, avoiding any damage due to handling.

(FRA)

Les paniers pour fibres optiques laser sont utilisés pour le positionnement de délicates et très fines fibres optiques pour chirurgie à laser.

Grâce aux supports Easyfit il est possible de contenir la longue fibre optique pour chirurgie à laser.

Cette solution permet de transporter et utiliser en toute sécurité, en évitant quelconque type de dommage dû à la manipulation.

Kirschner wires dispenser — Distributeur des fils de Kirschner

(ENG)

Kirschner wires dispenser are suitable for transport, decontamination, washing and steam sterilization of the commonly used Kirschner wires. The distributors have smooth surfaces and they are completely free of sharp edges to ensure maximum safety during handling to avoid any possibility of breaking of soft packaging used for steam sterilization (paper, envelopes, etc.). The practical and safe interlocking closure system avoids any mixing of wires of different diameters. The dispenser has 2 silicone supports (slotted) positioned on the short side (one each side) to protect the tips of the Kirschner wires during handling. The wire support shows the indication of the positionable diameters with its size (hole) next alongside each usable slot. Each slot of the support can keep up to 10 wires per diameter.

(FRA)

Le distributeur des fils de Kirschner est approprié pour le transport, la décontamination, le lavage et la stérilisation à vapeur des broches de Kirschner.

Les distributeurs ont des surfaces lisses et ils sont sans bords tranchants afin d'assurer une sécurité maximale lors de la manipulation, cela élimine toute possibilité de rupture des emballages souples utilisés pour la stérilisation à vapeur (papier, enveloppes, etc.).

Le système de fermeture à verrouillage est pratique, sûr et évite le mélange des broches de diamètres différents. Il présente 2 supports en silicone (non toxique) positionnés sur les bords courts (un de chaque côté) pour protéger la pointe des broches de Kirschner pendant la manipulation.

Sur le support se trouve les stamillees pour chaque broche.

Le logement du support peut contenir jusqu'à 10 broches par diamètre.

Laparoscopic frames

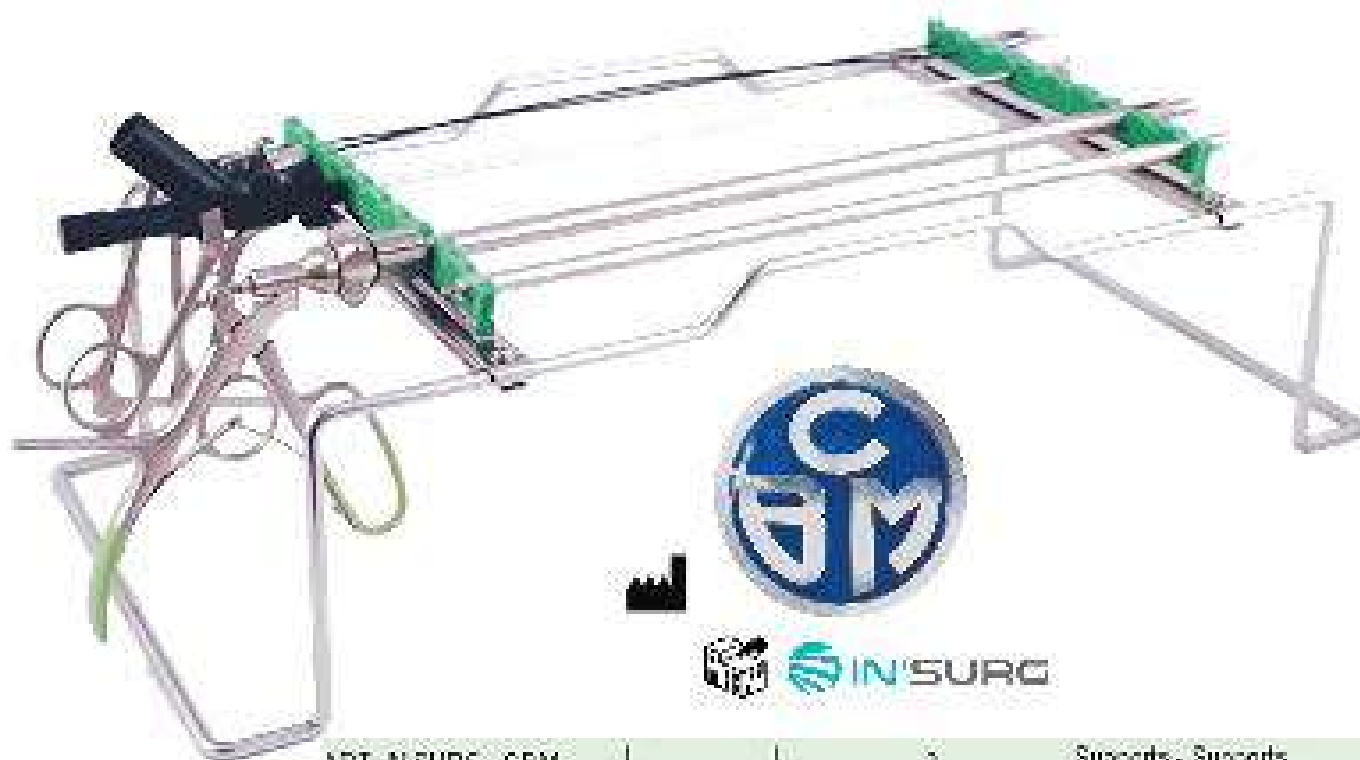

Supports pour laparoscopie

(ENG)

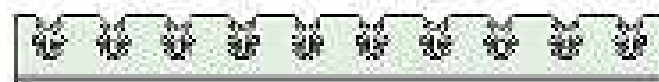

Laparoscopic frames are very useful for the creation of a single patient laparoscopic surgery kit. The sturdy wire frames, entirely made in stainless steel AISI304, allows the correct steam circulation all around the laparoscopic instruments. Moreover thanks to its design, Laparoscopic frame can be used to extract aseptically the entire kit from sterilisation packaging and safely place all the instruments on the instruments table.

(FRA)

Les supports pour laparoscopie sont très utiles pour la création de kits séparés pour la chirurgie laparoscopique du patient. Le support en fil métallique entièrement en acier inoxydable AISI304, permet la correcte circulation de la vapeur pour des instruments laparoscopiques. En outre, grâce à son design, le support pour laparoscopie peut être utilisé pour extraire, de façon aseptique, de l'emballage de stérilisation le kit entier et placer tous les instruments sur la table en toute sécurité.

Armand TROUSSEAU
(14 octobre 1801 - 23 juin 1867)

était un **médecin, clinicien et homme politique** français ayant effectué des recherches sur **la fièvre jaune**. Il fût récompensé pour ses travaux. Il sera l'**un des premiers à appliquer la trachéotomie**. Son nom sera donné à une **contracture de la main (signe de Trousseau)**, ainsi qu'à **un dilatateur et une canule**.

Garantie
totale
2 ANS
sans conditions

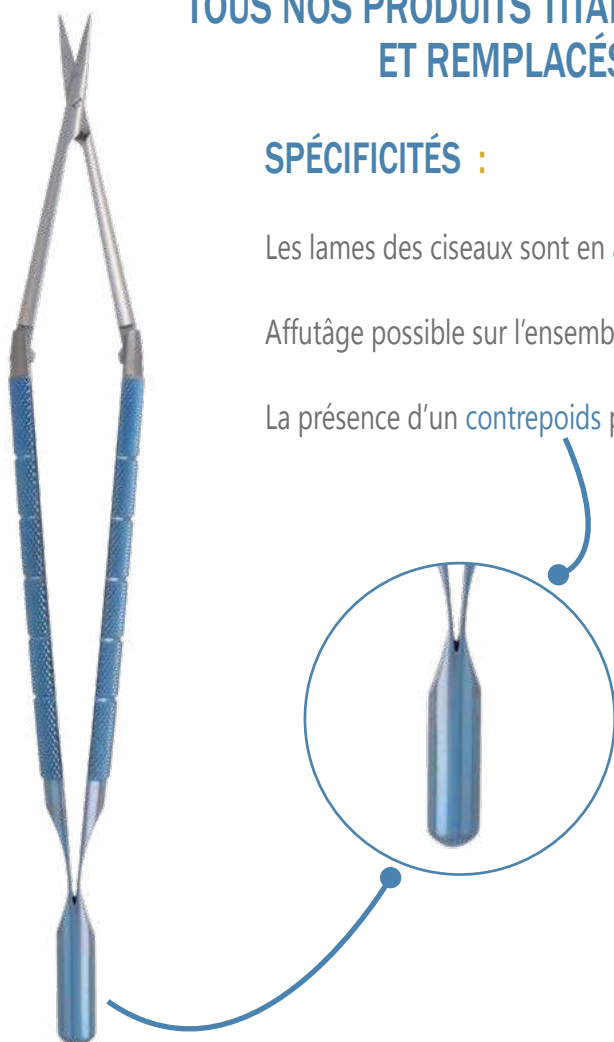

TOUS NOS PRODUITS TITAN ULTRA SONT GARANTIS 2 ANS ET REMPLACÉS SANS CONDITIONS

SPÉCIFICITÉS :

Les lames des ciseaux sont en **acier inoxydable** pour une qualité de coupe optimale.

Affûtage possible sur l'ensemble des ciseaux de la gamme TITAN ULTRA

La présence d'un **contrepoids** permet d'obtenir un meilleur équilibre

!!! AVANTAGE !!!

**2 X PLUS LEGER QUE
L'ACIER INOXYDABLE**

RETRO 'SPECTIVE

Richard von VOLKMANN
(17 août 1830 - 28 novembre 1889)

était un **poète et chirurgien** allemand. Il réalisa **la première excision d'un carcinome du rectum** en 1878. Il décrit le **syndrome de Volkmann** en 1881, puis **invente une attelle et une cuillère qui portent son nom**. Aujourd'hui, son **traitement de la tuberculose articulaire** fait la gloire de la chirurgie préventive.
